

GET STARTED (Activation)

1

OPEN THE CAP

Unscrew the top cap of the Glow Charger Cannister by pressing down hard on the finger indent slots, and twist the cap counter-clockwise until it clicks open

2

ACTIVATE THE BATTERIES

Your Glow Charger comes with 4 AA Alkaline Batteries pre-installed.

- Locate the plastic pull-tab between the batteries and the terminal.
- Pull and remove the tab completely. This allows the electrical connection to be made.
- Note: If the tab is stuck, gently remove the batteries, take out the tab, and re-insert the batteries following the +/- polarity markings.

3

POWER ON

Replace the cap securely. Turn the power switch to the ON position. You should see a purple/blue UV glow inside the chamber.

BEST USE & SAFETY

ON-THE-COURSE CONVENIENCE

The Glow Charger is designed to fit perfectly in your golf cart cup holder.

- Pro Tip: For maximum brightness, keep a GlowV1 ball inside the canister while driving to your next shot.
- Charge Time: Just 30–60 seconds in the canister provides an ultra-bright glow for your next hole!

SAFETY & CARE

- EYE SAFETY: High-intensity UV Light. Do not stare directly into the light source while the unit is on.
- KEEP DRY: While durable, the charger is not waterproof. Avoid submerging or leaving in heavy rain.
- BATTERY REPLACEMENT: When the glow begins to dim, replace all four batteries with fresh AA Alkaline batteries.
